EDUCATION

National Taiwan University

B.A. in Economics

Taipei, Taiwan

Sep 2022 – Dec 2026 (expected)

- **GPA:** 3.87/4.30
- **Relevant modules:** Calculus I–IV; Linear Algebra; Statistics; Introductory Econometrics; Econometrics II; Machine Learning and Econometrics; Statistical Learning and Deep Learning; Operations Research; Text Mining.

PROFESSIONAL EXPERIENCE

Cathay United Bank

Digital Finance × AI Intern

Taipei, Taiwan

Jan 2026 – Apr 2026

- Benchmarked 8+ LLMs (locally run open-weight models and commercial APIs) with Ragas on a 672-question banking QA set, to test whether a planned app-review auto-reply could stay in-house for privacy and cost.
- Traced weak answers to the RAG pipeline's short, non-overlapping chunks; rewrote chunking at paragraph boundaries and added BM25 + dense retrieval, raising Ragas answer correctness by about 20% (relative).
- Built the agentic workflow for a VLM-driven mobile agent (Maestro, ADB, Ollama); running on fully local inference, the agent completed a 10-step transfer end to end in the real CUBE App on a company test device.

Ernst & Young (EY)

Technology Consultant Intern, Data Analytics & Digital Emerging Technology Team

Taipei, Taiwan

Jun 2025 – Jul 2025

- Added privacy-audit logging (Bash, SQL) to an EY SaaS product to meet client needs, recording which system nodes each employee accessed and which personal-data files those nodes touched.
- Built a reusable master pitch deck for banking clients and Power BI dashboards on carbon emissions.

Flexsoft

Software Engineer Intern

Kuala Lumpur, Malaysia

Jul 2023 – Aug 2023

- Fixed errors in client-specific accounting reports by rewriting the underlying SQL queries.

RESEARCH & PROJECTS

TASSEL Lab, Department of Economics, NTU

Research Assistant (PI: Joseph Tao-yi Wang)

Taipei, Taiwan

Jan 2026 – Present

- Re-implemented and debugged the algorithm that infers each subject's language structure in a migrant–local sender–receiver game experiment; helped decide how distances between messages are computed.
- Analysed what drives active language learning among 18 subjects with Firth's logit and random effects (CR3 SEs by subject); scored each round's guessing difficulty with Bayesian methods and an LLM API.

Machine Learning and Econometrics, NTU

Final project (sole author): Did ChatGPT Change How Journalists Write?

Taipei, Taiwan

Feb 2026 – Jun 2026

- Scraped 6,293 articles by 42 Taiwanese reporters; measured topics and wording with LDA and word frequencies.
- Estimated ChatGPT's effect with a TWFE DiD (wild cluster bootstrap), event study, double ML and causal forests; male reporters' wording became more regular, but the gender gap was not statistically significant.

Institute for Replication (I4R), AI Replication Games

Replicator; co-author of the resulting meta-paper (in preparation)

Remote

May 2026

- Reproduced an *AEE: Applied* paper on heat and baseball attendance in the human-only (no-AI) arm and wrote a referee report; afterwards completed two robustness checks independently with AI assistance.

iDSSP Lab, Department of Electrical Engineering, NTU

Undergraduate Researcher

Taipei, Taiwan

Jan 2025 – Dec 2025

- Team project: applied adversarial debiasing to a MovieLens 1M recommender, cutting NDCG-weighted top- k recommendation gaps between users who differ only in gender, age or occupation 6–20× at under 1 pp accuracy cost.

LEADERSHIP & ACTIVITIES

Economics Badminton Team, NTU

Vice Captain

Taipei, Taiwan

Jun 2024 – Jul 2025

- Proposed and ran training in English, which brought in 10+ international students and kept fee income steady through exam and holiday periods; the team won the NTU College of Social Sciences Badminton Cup (Dec 2024).

Other activities: Python Camp teaching assistant (2024); NTU international campus tour guide (2024); alumni Uniform Day coordinator, 200+ attendees (2023).

ADDITIONAL SKILLS

- **Technical:** Python (pandas, scikit-learn, PyTorch), R, SQL, Stata; Ragas, Ollama, Maestro, ADB; GCP, Power BI, Git, L^AT_EX; LeetCode rating 1825 (top 6.7%).
- **Languages:** English (IELTS 8.0, TOEIC 975), Mandarin (native), Taiwanese (native), Spanish (basic).
